

To Whom It May Concern:

Air-1, K-Love and other Christian radio stations have been such a blessing to me in my life. I've received encouragement at just the right times and they've reminded me to stay positive about life and the situations that I'm facing. It means a lot to me to be able to turn on the radio and listen to a Christian radio station that is free to speak the message of Jesus Christ. If that message offends people then they can change the station as I do when I hear offensive lyrics and language on other stations. We have a choice and a free will and I hope that all of that will not change in our country where freedom of speech has been a large bolder in our foundation.

I am writing you because I do not want an advisory board over these stations dictating what *they* want or don't want to be said and played. As a right to freedom of speech and freedom of religion, these stations should not be forced into allowing air time to which ever organization desires it and they shouldn't be kept from doing the good that they are doing. They are *bettering* the world, not making it more chaotic and violent. These stations should be the last to be tampered with.

Additionally, as these stations are listener-supported (as I also have contributed), I don't believe that additional staffing is required for these stations to run effectively and it would be terrible if their translators were no longer able to carry their stations and so be forced off the air.

Please, don't let this happen. These are great stations that have blessed so many people, including myself. Besides being against the foundation of the Constitution of the United States, limiting, censoring and dictating to these stations would cause more turmoil than any good (if there is any to be had through this proposal). Please don't make these changes. We should be free to worship and free to speak... unhindered by an opposing group's ideology/theology.

Thank you so much for your time. May you be blessed for your kindness and understanding.

Sincerely,

Natalie Morgan
